Clinical Users' Comments

“There is no other system in the world that is comparable or gets such outstanding results.”

Dr. Leonard Rudnick, Laser Therapeutics of Southern Arizona

“As a physiotherapist, I must say that BioFlex gave me the best results imaginable. After seven laser treatments over a period of two and a half weeks, I was totally asymptomatic. I've tried other treatments in the past – including ultrasound, heat, short wave diathermy and a variety of non-steroidal anti-inflammatory medication – but none have even come close to matching the effectiveness of BioFlex.”

Chris MacHattie, Orthopedic Physiotherapist, The Toronto Hospital

“BioFlex Low Intensity Laser Therapy is poised to become the ideal treatment for sports injuries and arthritis in the 21st century.”

Dr. Peter Furno, Pain Management Center, Indianapolis

“Since starting with the laser (BioFlex), I have had some outstanding results in being able to get our athletes back to the game and practice. I have no hesitations to give this unit my full endorsement.”

Chuck Mooney, Head Trainer, Toronto Raptors

“BioFlex represents a major advancement in Low Intensity Laser Therapy and is the ideal research and clinical system for the future.”

**Professor Tiina Karu
Laser Technology Research Center of Russian Academy of Sciences**

“LILT is one of the most underutilized pain management options available today. Once incorporated by our patients, it is typically one of the most appreciated treatments based on its tolerability and cumulative efficacy. The BioFlex system presents a comprehensive, easy to incorporate approach to introducing low intensity laser therapeutics to patients with pain.”

Dear Dr. Kahn:

Subject: Meditech Bioflex Laser

I would like to let you know how the use of the laser unit has been helping the Toronto Raptors Basketball Club.

- Before using the laser, I had been using an ultrasound, a galvanic stim, and an interferential unit with some expected results but not the significant change that we require when athletes make \$30,000.00 every time they play.
- Since starting with the laser, I have had some outstanding results in being able to get our athletes back to the game and practice.
- There have been some exceptional changes in a particular injury that I would like to share with you. One of our athletes sustained a foot injury following a sprain that had kept him out of play for 3 weeks without any significant change. A specialist that concurred with our doctors that sometimes these injuries take a significant time to resolve and sometimes require surgery saw him after the three weeks. I had been using every modality as well as manual therapy techniques with out any changes. I used your laser after consulting with Dr. Baxter and yourself and with in three days he was able to practice and play two days later. Without the laser, I expect it would have been a minimum of another two weeks before his return.

The Bioflex unit itself has been very easy to use and its adaptability has been its significant advantage over all other units that I have been exposed to.

I must admit my skepticism for the use of lasers since I had not had the results that you claimed with other units. I also did not like the time that it took to treat with other single probe and cluster probe units. Since starting with the Meditech Bioflex unit it has become our prime modality and continues to impress me.

The software with the equipment is very easy to work with and I simply can not tell you how happy I am with the adaptability of the unit's critical output.

I have no hesitation to give this unit my full endorsement and have spoken to several of my colleagues in the NBA, and the Toronto Blue Jays about my results and my suggestion that they purchase a unit.

Sincerely,

Chuck Mooney

Dear Dr. Kahn,

It was most enjoyable seeing you again and having the opportunity to see your facilities, and learn first hand from some of your patients about their remarkable improvements through your laser therapy.

Our results with our athletes have not been as dramatic as yours. But on our level your laser system has proven to be an extraordinarily valuable addition to our treatment program. I have several players now that only wish to have their injuries treated with the laser.

We have had great success treating the "itis" problems. Both patellar and plantar fasciitis are responding to treatment very quickly and we couldn't be more pleased.

My only regret is that it took me three years of talking and researching to be convinced to acquire a unit.

Dear Dr. Kahn,

I'm so grateful a friend of mine in Bozeman introduced me to you.

For the past two years, my right rotator cuff has given me nothing but problems. I'm convinced that without your laser unit, I would not be playing competitive golf as I am now.

Thank you so much for the unit and I can only hope the world will find out about you and benefit as much as I have.

Kindest Regards,

Steve Jones

Dear Fred,

As a former PGA tour professional, I am aware that fitness is of the utmost importance. For the past few years I have found that despite strenuous exercise and stretching programs, various areas in my body have become exceedingly painful and my flexibility has diminished; the benefits of age! Between 1965 and 1970 I had three shoulder surgeries, which were only partially successful.

A variety of physicians that I have seen over the years prescribed analgesics, anti-inflammatories, and sleeping medications in limitless quantities. Many of these led to significant gastrointestinal discomfort. In addition, I saw many therapists, including chiropractors, physiotherapists and massage therapists. Despite these strenuous therapeutic efforts, my symptoms continued to increase and my golf scores went up. Sometimes the latter became stratospheric and I seriously considered giving up golf, which has been my life.

Approximately two months ago, I was referred to the Laser Therapy Centre and was seen by Dr. Fred Kahn, the founder. Dr. Kahn indicated that I was suffering from arthritis of the back, shoulders, knees, and there were also varying degrees of myofascitis involved, primarily in the same areas.

After approximately three treatments per week for the first three weeks, and then receiving two treatments per week until the present, virtually all of my symptoms have cleared up. In addition, I have ceased to utilize any medications whatsoever. I now feel better than I did in my 40's and 50's and only require therapy about once a week.

The result of this program is that my flexibility is relatively normal; I can take a full turn on my backswing without any pain whatsoever in either the shoulders or the spine. Most pleasing of all, I am scoring par or better most days and have shot several rounds in competition between 66 and 71!

Over the past few weeks, as a result of this gratifying outcome, I have referred many friends and family members to this clinic for a variety of musculoskeletal disorders and must say that all are equally pleased with the results obtained.

Sincerely,

Al Balding

Dear Fred:

Last night I started playing basketball in the Burlington Men's League for the 21st year. After the season last year, I did not think that I would be back. At the end of last year's playoffs, my right knee (which had been operated on September 10, 2001 for a torn meniscus) was very painful just to walk or even sleeping at night.

After 15 treatments at Meditech with the infrared laser treatments, I now sleep comfortable and get to walk our dog, Mykayla, without any noticeable pain. But more importantly, there is little pain on my right knee when cutting toward the hoop or pushing off the basket in a lay up.

Overall, I am elated that my right knee is at least 70-80% better than where it was a year ago! Many thanks to your knowledgeable personnel and to your personal dedication in pursuing my well being over the visits employing the BioFlex low intensity laser therapy.

Sincerely yours,

T.G.
